## Review

- Major Vascular Neurocognitive Disorder  
Emre Kumral, Ozan Özgören

## Research Articles

- Falls in Idiopathic Parkinson's Disease  
Ferhan Soyuer, Feyzan Cankurtaran, Murat Gültekin,  
Meral Mirza, Gözde Ertürk
- Botulinum Toxin Treatment in Stroke Patients  
Bekir Enes Demiryürek, Aslı Aksoy Gündoğdu
- Telerehabilitation in Turkey  
Esra Doğru Hüzmeli, Taşkın Duman, Hatice Yıldırım

## Case Reports

- Mirror Imaginary Movement Disorder and Pachygyria  
Association  
Yusuf Ehi, Sefer Üstebay, Döndü Ülker Üstebay, Yunus Yılmaz,  
Sunay Sibel Karayol
- Posterior Interosseous Neuropathy  
Ayşen Süzen Ekinci, Şeyma Çiftçi, İbrahim Aydoğdu

## Image in Clinical Neurology

- Late Onset Tremor and Ataxia Syndrome  
Levent Öcek, Onural Tümer, Figen Tokuçoğlu, Özgür Öztekin,  
Yaşar Zorlu
- Superficial Cerebral Hemosiderosis and Spinal Surgery  
Levent Öcek, Feray Güleç Uyaroğlu, Ali Çayır, Özgür Öztekin,  
Yaşar Zorlu
- Juvenile Neuronal Ceroid Lipofuscinoses  
Deepak Jain, H.K. Aggarwal, Pulkit Chhabra, Avinash Rao

## Frontiers in Neurology

- Long-Term Evolution of Multiple Sclerosis  
Özgü Kizek

## Meeting Highlights

- Following the 52<sup>nd</sup> National Neurology Congress  
İpek Güngör Doğan

Official Journal of the Turkish Neurological Society

International scientific journal published quarterly.

# Turkish Journal of Neurology

## AIM AND SCOPE

The Turkish Journal of Neurology has been published quarterly in March, June, September and December as the official journal of the Turkish Neurological Society since 1995. The journal has been also available online since 2004. A peer-reviewed system is used to select manuscripts. The languages of the journal are Turkish and English. Original research articles are particularly supported and encouraged.

The journal aims to update knowledge of neurology throughout Turkey with research articles, reviews, case reports, short communications, letters to the editor, and clinical images in the field of neurology. To retain interdisciplinary transfer of information between the areas of neuroscience and to undertake a novel effort in the international representation and attribution of published articles are the other aims of the journal.

The target readers of the Turkish Journal of Neurology include neurologists and neurology residents as well as other physicians working in the field of neurological sciences.

Turkish Journal of Neurology is indexed in Web of Science; Emerging Sources Citation Index (ESCI), Directory of Open Access Journals (DOAJ), Chemical Abstracts Service (CAS), EBSCOhost Research Databases, Index Copernicus, Scopus, Turk Medline, Türkiye Citation Index.

### Open Access Policy

This journal provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge.

Open Access Policy is based on rules of Budapest Open Access Initiative (BOAI) <http://www.budapestopenaccessinitiative.org/>. By "open access" to [peer-reviewed research literature], we mean its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited.

### Subscriptions

The Turkish Journal of Neurology is delivered complimentary to the members of Turkish Neurological Society and other scientists and

physicians interested in neurology. Tables of contents, abstracts and full texts of all articles published are accessible free of charge through the web site [www.tjn.org.tr](http://www.tjn.org.tr) since 2004. For subscriptions, please contact the Turkish Neurological Society.

### Address

Turkish Neurological Society

### Instructions for Authors

Instructions for authors are published in the journal and are accessible via [www.tjn.org.tr](http://www.tjn.org.tr)

### Material Disclaimer

Scientific and legal responsibilities pertaining to the papers belong to the authors. Contents of the manuscripts and accuracy of references are also the author's responsibility. The Turkish Neurological Society, the Editor, the Editorial Board or the publisher do not accept any responsibility for the articles.

The journal is printed on acid-free paper.

# Turkish Journal of Neurology

## INSTRUCTIONS TO THE AUTHORS

### Instructions to Authors

The Turkish Journal of Neurology is the periodical publication of the Turkish Neurological Society, which is published quarterly (March, June, September, December).

The Journal's publication languages are Turkish and English. Manuscripts in Turkish should comply with the Turkish Dictionary and Spelling Dictionary of Turkish Linguistic Association (<http://tdk.org.tr>).

Anatomic terminology should be based on Latin nomenclature. Medical terms that have established use in everyday medical language should be written as they are read in accordance with Turkish spelling rules. Quotation marks should be used for terms written in English or other foreign language.

Turkish Journal of Neurology is indexed in Emerging Sources Citation Index (ESCI), Directory of Open Access Journals (DOAJ), Chemical Abstracts Service (CAS), EBSCOhost Research Databases, Index Copernicus, Scopus, Turk Medline, Türkiye Citation Index.

The abbreviation of the Journal in international indexes and databases is recorded as Turk J Neurol.

The Turkish Journal of Neurology does not charge any fees for submission or processing of manuscripts.

### Ethical Issues and Peer Review

The Turkish Journal of Neurology is an independent, non-biased, periodical publication that adheres to the double-blind peer review process.

The Publication Policy and Manuscript Writing Rules were prepared in accordance with the Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals (ICMJE Recommendations) (2013, <http://www.icmje.org>).

Submitted manuscripts are first evaluated for their scientific value by the editor and vice editors. If found suitable, manuscripts are sent to at least two peer reviewers for evaluation. The Editorial Board may also send the manuscript to another reviewer if necessary. Reviewers are selected from independent experts on the topic inside or outside Turkey. Vice editors add their own evaluations to the peer reviews and send them to the Editor-in-Chief. The final decision is made by the Editor-in-Chief. The whole evaluation process is aimed to be finished within 3 months. Every submission is also evaluated by the statistics editor.

Dates when the manuscript was received and accepted are stated in the issue the manuscript is published.

The Editor-in-Chief and vice editors have the right to reject, to return manuscripts for revision, or to revise the format of manuscripts that do not comply with publication rules.

Turkish Journal of Neurology declares to principally comply with the ethics standards of the Declaration of Helsinki (<http://www.wma.net/en/30publications/10policies/b3/index.html>). Therefore, all studies that involve human subjects, patients or volunteers should be informed and their consents should be taken. This information should be provided in the "Materials and Methods" section of the manuscript. Studies involving animals must contain a statement indicating that principles of the Guide for the Care and Use of Animals ([www.nap.edu/catalog/5140.html](http://www.nap.edu/catalog/5140.html)) were complied with during the study, and approval was obtained from Institutional Ethics Committee (including approval number). The Editor may ask for a copy of the document if necessary.

All manuscripts submitted to the journal for publication will be scanned using iThenticate software for plagiarism. Submissions may be rejected according to the result of this scan. If plagiarism is detected, relevant institutions may be notified. In this case, the authors might be asked to send raw data of their studies to relevant institutions.

The scientific and legal responsibility for manuscripts sent to our journal for publication belongs to the authors. Authors are responsible for the correctness of opinions, recommendations, and references in their manuscripts. Copyrights of manuscripts accepted for publication belongs to the Turkish Neurological Society. After acceptance of the manuscript for publication, a Copyright Transfer Form should be completed, signed by all authors, and sent to [info@noroloji.org.tr](mailto:info@noroloji.org.tr) or faxed to +90 312 431 60 90. No payment is made to the authors for copyright.

All manuscripts submitted for publication should be prepared in accordance with Uniform Requirements for Manuscripts Submitted to Biomedical Journals Editors (<http://www.ulakbim.gov.tr/cabim/vt/uvvt/tip/>) as prepared by the International Committee of Medical Journal Editors (ICMJE).

Authors are required to accept that editors and vice editors can make revisions in the manuscript without making a major change in the manuscript.

If the manuscript includes a commercial link or if an institution provides material support to the study, authors should inform the editor about the presence and type (consultant, other agreements) of the relation with the product, drug, or company.

In case of any suspicion or claim regarding scientific shortcomings or ethical infringement, the Journal reserves the right to submit the manuscript to the supporting institutions or other authorities for investigation. The Journal accepts the responsibility of initiating action but does not undertake any responsibility for an actual investigation or any power of decision.

Preparation of research articles, systematic reviews and meta-analyses must comply with study design guidelines:

CONSORT statement for randomized controlled trials (Moher D, Schultz KF, Altman D, for the CONSORT Group. The CONSORT statement revised recommendations for improving the quality of reports of parallel group randomized trials. *JAMA* 2001; 285: 1987-91) (<http://www.consort-statement.org/>);

PRISMA statement of preferred reporting items for systematic reviews and meta-analyses (Moher D, Liberati A, Tetzlaff J, Altman DG, The PRISMA Group. Preferred Reporting Items for Systematic Reviews and Meta-Analyses: The PRISMA Statement. *PLoS Med* 2009; 6(7): e1000097.) (<http://www.prisma-statement.org/>);

STARD checklist for the reporting of studies of diagnostic accuracy (Bossuyt PM, Reitsma JB, Bruns DE, Gatsonis CA, Glasziou PP, Irwig LM, et al., for the STARD Group. Towards complete and accurate reporting of studies of diagnostic accuracy: the STARD initiative. *Ann Intern Med* 2003;138:40-4.) (<http://www.stard-statement.org/>);

STROBE statement, a checklist of items that should be included in reports of observational studies (<http://www.strobe-statement.org/>);

MOOSE guidelines for meta-analysis and systemic reviews of observational studies (Stroup DF, Berlin JA, Morton SC, et al. Meta-analysis of observational studies in epidemiology: a proposal for reporting Meta-analysis of observational Studies in Epidemiology (MOOSE) group. *JAMA* 2000; 283: 2008-12).

### General Rules

Only online submissions are accepted ([www.tjn.org.tr](http://www.tjn.org.tr)). To submit an article, authors should subscribe to the Journal Agent website (<http://www.tjn.org.tr>) and obtain a personal password. This system enables online submission and evaluation of the manuscript. Collected articles are processed and archived by this system in compliance with principles of ICMJE, Index Medicus (Medline/PubMed), and Science Citation Index (SCI).

**Paper layout:** The manuscript text should be written in Verdana font, 10 point-type, double spaced with 2 cm margins on both sides. The manuscript text should be prepared with a computer program compatible with Windows operating system (Microsoft Windows, Word 98 or later versions). Page numbers should be used starting from the initial page and page numbers should be at the bottom right corner of each page. The main manuscript file should not include author names or their institutions.

**Abbreviations:** Abbreviations used in the journal should be nationally or internationally accepted, should be defined in the text when first used, and written in parenthesis. Afterwards, the abbreviation should be used throughout the text. A Turkish source 'Bilimsel Bir Makale Nasıl Yazılır ve Yayınlanır (How to write and publish a scientific article?)' can be referred for international abbreviations ([https://ulakbim.tubitak.gov.tr/sites/images/Ulakbim/eyes2\\_yazar\\_1.pdf](https://ulakbim.tubitak.gov.tr/sites/images/Ulakbim/eyes2_yazar_1.pdf)).

**Title page:** Title page should include Turkish and English titles, Turkish and English running titles shorter than 40 characters including spaces, the names and, last names of the authors. The clinic, department, institution, and organization in which the study was conducted should also be stated. Corresponding author's name, address, e-mail, phone and fax numbers should also be included in the title page. Previous presentations of the study in symposia or congresses should also be stated.

# Turkish Journal of Neurology

## INSTRUCTIONS TO THE AUTHORS

Any financial or other support from any person or institution should be mentioned under the heading of Conflict of Interest. Also in studies with multiple authors, the roles of every author should be defined.

Turkish Journal of Neurology expects that every author meets at least one of the following internationally accepted criteria:

1. Contributed in the preparation of the project, or obtained, analyzed or interpreted data of the study,
2. Made a significant contribution during writing or intellectual development of the article,

In addition, all of the authors should give consent to correctness, originality, and wholeness of the study (<http://www.icmje.org/recommendations/browse/roles-and-responsibilities/defining-the-role-of-authors-and-contributors.html>).

### Pictures, tables, graphs, and figures

Tables, figures, graphs, and pictures should be numbered according to the sequence of referral within the text. Each table, figure, graph, or picture should be cited in the text. Explanations should be made for abbreviations in footnotes. Tables should be prepared to explain the text and not be a repetition of text or figures. Caution must be exercised in order not to send color pictures, graphs, or figures.

**Pictures:** X-ray films, computed tomography and magnetic resonance imaging scans, other diagnostic images, and pictures of pathology specimens should be sent in 127-173 mm dimensions and high quality. Letters, numbers, and symbols on pictures should be clear, consistent throughout, and large enough to be legible when the picture is reduced for publication. Pictures should be as self-explanatory as possible. When pictures or images of patients are used, the patient's name and eyes should be censored to prevent identification, and consent should be obtained from the patient or his/her legal representatives. Legends for illustrations should be written using double-spacing starting on a separate page and Arabic numerals should be used for corresponding illustrations. When symbols, arrows, numbers or letters are used to identify parts of illustrations, each should be clearly explained in the legend. Patients' names should not be written in pictures and omitted from radiologic images.

Pictures should be numbered according to the sequence of referral within the text and a short title should be written for each picture. When a picture from another source is used, permission of the author and publisher must be obtained and sent to the journal. Details of photographs should be distinguishable; they should be recorded in JPEG format and at least 300 pixels/inch resolution.

**Tables, graphs and figures:** Each table should be prepared with double-spacing on a separate page. Tables should have a brief title. Explanations should be made in footnotes instead of heading. Explanations should be made for all nonstandard abbreviations in footnotes. The following symbols should be used in footnotes in sequence: \*, †, ‡, §, ||, ¶, \*\*, ††, ‡‡. Each table should be cited in the text.

Figures and graphs should be drawn professionally or photographed, and should be of photographic quality when digitally recorded. Electronic files of figures or graphs should be sent in JPEG or GIF format that will produce high quality images and the quality of the files should be checked on a computer screen before submission. If the article contains tables, graphs, figures or pictures from a previously published article, written consent should be obtained from the authors and copyright owners and this should be stated.

### Manuscript Types

#### Original Article

Includes clinical research, clinical observation, new methods, and experimental and laboratory studies. Research articles should include title, abstract, keywords related with main topic of the study, findings, discussion, acknowledgements, references, tables, graphs, and pictures. Title, abstract, and keywords should be both in Turkish and English. Research articles should not exceed 5000 words and 40 references.

**Title page:** The page that includes title of the article, author names, and information about the authors.

**Abstract:** Turkish and English abstracts should be included in original articles and case reports. Abbreviations should be avoided in abstracts if possible. In this section there should be no references, figures, tables, or citations. Abstracts should mention

the main topics of the article and not exceed 300 words. The English abstract should be structured to include "Objective," "Materials and Methods/Patients and Methods," "Results," and "Conclusion" sections.

In original articles, the Abstract should include the following 5 subheadings:

- 1. Objective:** The aim of the study should be clearly identified.
- 2. Material and Method:** The study should be defined, inclusion criteria, whether it was randomized, retrospective or prospective, and statistical methods should be stated.
- 3. Results:** Detailed results of the study should be given and the level of statistical significance should be stated.
- 4. Conclusion:** The conclusion should reflect the study results, define clinical usefulness, and show strengths and limitations.
- 5. Keywords:** At least 3 and no more than 5 keywords should be included at the end of abstracts. Standard terminology should be used for keywords. Medical Subject Headings (MeSH) can be used for writing keywords ([www.nlm.nih.gov/mesh/MBrowser.html](http://www.nlm.nih.gov/mesh/MBrowser.html)).

Original research articles should include the following sections:

- 1. Introduction:** Concise information should be given about the topic, the aim of the study should be stated, and these should be supported by the literature.
- 2. Materials and Methods:** The study plan should be given, whether randomization was made, prospective or retrospective nature of the study, number of subjects, and inclusion and exclusion criteria should be explained.
- 3. Results:** Results, tables, and figures should be given and the results should be evaluated considering statistical methods used in the study. Writing rules about visual material can be found under "General Rules" in the section of "Pictures, Tables, Graphs, and Pictures".
- 4. Discussion:** Results should be discussed with strengths and limitations, and compared with the literature.
- 5. Conclusion:** Conclusions of the study should be emphasized in one or two paragraphs.
- 6. Acknowledgement:** Any conflict of interest, financial support, donation, or other editorial and/or technical support (statistical analysis, English/Turkish evaluation) should be stated at the end of the text. Every person who contributed to the article by technical support, writing and proofreading of the article, data collection, and/or analysis but do not meet the criteria to be an author should be mentioned in the acknowledgement section.
- 7. References:** References should include up-to-date publications when possible. Authors are responsible for correctness of references. Information about writing rules for references can be found in the "References" subsection of the "General Rules" section.

### Review Articles

A review evaluates a current topic in detail independently without overemphasizing a particular opinion. As reviews to be published in the Journal are planned by the Editor, authors of any reviews other than those invited should obtain consent of the Editor before submission to the Journal. Reviews should include a title page in Turkish, abstract in Turkish, Keywords in Turkish (minimum 3, maximum 5 words), title in English, abstract in English, and keywords in English. The Abstract of a review should be prepared as a single paragraph and limited to 300 words. There is no need to structure the abstract. Reviews should not exceed 8000 words. Also, the number of references should be less than 100.

### Case Report

Case reports should include cases that are rarely seen, unique in diagnosis or treatment, and add new information to the scientific knowledge.

Case reports should include a title in Turkish, abstract in Turkish, keywords in Turkish, title in English, abstract in English, keywords in English, Introduction, Case, Discussion, Study limitations, and Conclusions. The Introduction and Discussion should be concise in case reports, and a single paragraph abstract that does not exceed 300 words should be prepared. A structured abstract is not necessary. Case reports should not exceed 2500 words, and it should not have more than 15 references.

# Turkish Journal of Neurology

## INSTRUCTIONS TO THE AUTHORS

### Short Communication

Reports representing a significant contribution in the related field may be concisely documented as a short communication. Short communications should include titles in Turkish and English, abstracts in Turkish and English as single paragraphs, and 2-5 keywords in Turkish and English. There is no need to prepare a structured abstract. The maximum length of a short communication is 1500 words, and tables and a no more than 2 figures/graphs/pictures should be included. References should be limited to 10.

### Letter to the Editor

These letters address issues or exchange views on topics arising from published articles. They should be concise, not exceed 750 words, should not include an abstract, and references should be limited to 5. Short case reports may also be published under this heading.

### Images in Clinical Neurology

Under this heading, images of rare neurologic conditions are published. The title should not exceed 10 words. The patient's history, physical examination and laboratory findings, clinical course, treatment response if applicable, and the latest condition of the patient should be summarized. The main theme of the manuscript should be the picture. All labeled structures in the image should be defined and explained in the legends. Images in clinical neurology texts should not exceed 500 words and 5 references. Graphs with high resolution (300 DPI) should be used, and not more than 4 pictures, figures or graphs should be included. Images in Clinical Neurology should not include subsections.

### Perspective

Under this heading unique, creative, and solution-oriented scientific ideas about problems faced by neurologists in Turkey are published. Manuscripts submitted under this topic should be sent as a single text without exceeding 500 words or 5 references.

### Meeting Highlights

Under this heading national or international meetings, congresses or symposiums in neurology, neurological sciences, or clinical neurology can be presented. Prominent scientific findings in these meetings should be summarized. Manuscripts submitted under this heading should be sent as a single text without exceeding 500 words. No references should be used in this section.

### Frontiers in Neurology

This section includes comments about articles that have been published in the previous year and believed to be important for its field. Manuscripts should include at most a figure or a table. These manuscripts are not simply translations of the articles. Prominent findings of the article should be summarized and they should be compared with previous scientific literature. Manuscripts should not include subsections and 3 references at the most should be included.

### References

- Data and manuscripts that have not yet been published should not be cited as references. These should be stated in the main text as "author(s), unpublished data, year".

- Reference numbers should be given in the text at the end of the sentence in parentheses and at the end of the manuscript they should be numbered consecutively in the order in which they are mentioned in the text. Journal names should be abbreviated as listed in "Index Medicus" or in "ULAK-BIM/Turkish Medical Index". References should be written in accordance with following examples:

### Journal Articles;

First letters of names and surnames of the authors (All authors should be written). Title of article. Abbreviated title of the journal according to Index Medicus (<http://www.ncbi.nlm.nih.gov/sites/entrez/query.fcgi?db=nlmcatalog>). Year of publication;Volume:first page number-Last page number.

Example: Wertman E, Zilber N, Abramsky O. An association between MS and type 1 diabetes mellitus. *J Neurol* 1992;239:43-45.

### Supplement;

First letters of names and surnames of the authors. Manuscript title. Abbreviated title of the journal according to Index Medicus (<http://www.ncbi.nlm.nih.gov/sites/entrez/>

[query.fcgi?db=nlmcatalog](http://www.ncbi.nlm.nih.gov/sites/entrez/query.fcgi?db=nlmcatalog)). Year of publication;Volume (supplement number):first page number-Last page number.

Example: Wasylenski DA. The cost of schizophrenia. *Can J Psychiatry* 1994;39(Suppl 2):65-69.

### Book;

First letters of names and surnames of the authors. Book title. Number of edition. City of publication: Publisher, Year of Publication.

Example: Ropper AH, Brown RH. Adams and Victor's Principles of Neurology. 8th ed. New York: McGraw-Hill, 2005.

### Book Chapter;

First letters of surnames and names of chapter editors. Chapter title. In: First letters of surnames and names of editors (eds). Book title. Edition number. City of publication: Publisher, Year of Publication. Number of first page of the chapter- number of last page.

Example: Pender MP. Multiple sclerosis. In: Pender MP, McCombe PA (eds). *Autoimmune Neurological Diseases*. 3rd ed. Cambridge: Cambridge University Press, 1995:89-154.

### Congress presentation;

First letters of surnames and names of the authors (all authors should be written). Manuscript title. In: First letters of surnames and names of the authors (eds). Book title. Name of the meeting; City where meeting took place, country where meeting took place. Publisher; Year. Page number.

Example: Bengtsson S, Solheim BG. Enforcement of data protection, privacy and security in medical informatics. In: Lun KC, Degoulet P, Piemme TE, Reinhoff O (eds). *MEDINFO 92. Proceedings of the 7th World Congress on Medical Informatics; 1992 Sep 6-10; Geneva, Switzerland. North-Holland; 1992. p. 1561-1565.*

Journal published electronically;

First letters of surnames and names of the authors (all authors should be written). Article title. Abbreviation of the Journal according to Index Medicus. Year;Volume(Number). Available from: URL address. Access date: Day.Month.Year.

Example: Morse SS. Factors in the emergence of infectious disease. *Emerg Infect Dis* 1995;1(1). Available from: URL:<http://www.cdc.gov/nci-doc/EID/eid.htm>. Accessed date:25.12.1999.

### Web site;

The name of the web site. Access date. Available from: Address of the Web site.

World Health Organization (WHO). Access Date: 9 July 2008. Available from: <http://www.who.int>

### Thesis;

First letters of authors surname name. Thesis title. Name of city: university; year.

Example: Kanpolat Y. Trigeminal Ganglion Deneysel Perikutan Giriş ve Radyofrekans Termik Lezyonun Histopatolojik Değerlendirilmesi (Doçentlik Tezi). Ankara: Ankara Üniversitesi; 1978.

## CONTENTS

### Review

- 1** Major Vascular Neurocognitive Disorder: A Reappraisal to Vascular Dementia  
*Majör Vasküler Nörokognitif Bozukluk: Vasküler Demansa Yeni Yaklaşım*  
Emre Kumral, Ozan Özgören

### Research Articles

- 9** Frequency of Falls and Relationship Between Falls, Socio-demographic and Clinical Factors in Idiopathic Parkinson's Disease  
*İdiyopatik Parkinson Hastalarında Düşme Sıklığının, Sosyo-demografik ve Klinik Faktörlerle İlişkisi*  
Ferhan Soyuer, Feyzan Cankurtaran, Murat Gültekin, Meral Mirza, Gözde Ertürk
- 15** The Evaluation of Botulinum Toxin Injection Effect for Poststroke Spasticity Treatment  
*İnme Sonrası Spastisite Tedavisinde Botulinum Toksin Enjeksiyonu Etkinliğinin Değerlendirilmesi*  
Bekir Enes Demiryürek, Aslı Aksoy Gündoğdu
- 21** Efficacy of Telerehabilitation in Patients with Stroke in Turkey: A Pilot Study  
*Türkiye'de İnmeli Hastalarda Telerehabilitasyonun Etkinliği: Pilot Çalışma*  
Esra Doğru Hüzmeli, Taşkın Duman, Hatice Yıldırım

### Case Reports

- 26** Mirror Imaginary Movement Disorder and Pachygyria Association: Case Report  
*Ayna Hayali Hareket Bozukluğu ve Pakigiri Birlikteliği: Olgu Sunumu*  
Yusuf Ehi, Sefer Üstebay, Döndü Ülker Üstebay, Yunus Yılmaz, Sunay Sibel Karayol
- 29** A Rare Case of Focal Neuropathy: Posterior Interosseous Neuropathy due to Lipoma  
*Nadir Görülen Bir Fokal Nöropati Olgusu: Lipomaya Bağlı Posterior İnterosseöz Nöropati*  
Ayşen Süzen Ekinci, Şeyma Çiftçi, İbrahim Aydoğdu

### Image in Clinical Neurology

- 32** Late-onset Tremor and Ataxia Syndrome: Fragile X-Associated Tremor/Ataxia Syndrome and Neuroimaging Findings  
*Geç Başlangıçlı Tremor Ataksi Sendromu: Fragil X Tremor Ataksi Sendromu ve Nörogörüntüleme Bulguları*  
Levent Öcek, Onural Tümer, Figen Tokuçoğlu, Özgür Öztekin, Yaşar Zorlu
- 34** A Rare Cause of Superficial Cerebral Hemosiderosis: Spinal Surgery  
*Serebral Süperfisial Hemosidorozisin Ender Bir Nedeni: Spinal Cerrahi*  
Levent Öcek, Feray Güleç Uyaroğlu, Ali Çayır, Özgür Öztekin, Yaşar Zorlu
- 37** Juvenile Neuronal Ceroid Lipofuscinoses: A Rare Case  
*Juvenil Nöronal Seroid Lipofusinozlar: Nadir Bir Olgu*  
Deepak Jain, H.K. Aggarwal, Pulkit Chhabra, Avinash Rao

### Frontiers in Neurology

- 39** The Predictive Role of NEDA in the Long-Term Course of Multiple Sclerosis  
*NEDA'nın Multipl Sklerozun Uzun Dönem Seyri Üzerindeki Belirleyici Etkisi*  
Özgü Kizek
